WORK EXPERIENCE

Incoming Software Engineering Intern, Salesforce, San Francisco, CA   **Summer 2021**
- Joining the Lightning Platform In-App Guidance Team as a full-stack engineer in the summer of 2021.

Venture Capital Analyst Intern, Idea Fund Partners, Durham, NC   **Jan. 2021 – Apr. 2021**
- Sourcing and deal review of 100+ startups for an early-stage fund that invests in B2B, prop tech, automation, and data companies.
- Synthesized an investment thesis mapping out the LTL logistics and supply chain industry.

Product Management Intern via True Ventures Fellowship, Hatch, Menlo Park, CA   **Jun. 2020 – Aug. 2020**
- Matched through the True Ventures Fellowship to intern at Hatch, a Series A startup on a mission to help families sleep better through 3 main smart sleep products.
- Increased productivity for finding resources by 72% by creating a company wiki used by the 50+ person company.
- Established a PRD for push notifications on Hatch's mobile app; spearheaded 3 meetings with engineers to define technical requirements for an Airship SDK integration and designed 5+ sample user flows to detail content strategy.
- Generated 7+ dashboards by writing SQL to analyze how users consume app content for the Hatch Restore product.

Business Development Intern, Postmates Inc., San Francisco, CA   **Jun. 2019 – Aug. 2019**
- Delivery as a Service product (an API enabling merchants to leverage the Postmates fleet for on-demand delivery).
- Created a PRD for a proposed new loyalty feature on the Postmates Delivery as a Service product platform.
- Garnered feedback through conducting user interviews by cold-calling 20+ merchants for the Shopify integration.
- Prospected, outreached, and pitched to new verticals including a retailer with 100+ stores launched in 4 markets.
- Designed 15+ product marketing materials distributed to 100+ enterprise, mid-market, and SMB merchants.

LEADERSHIP EXPERIENCE

Vice President, LaunchDeck, Swarthmore, PA   **Sep. 2020 - Present**
- Revamped from scratch to lead 150+ members for Swarthmore's largest entrepreneurship and technology club.
- Launched a VC arm to fund student projects; reviewing 20+ applications and allocations from a $5,000+ fund.

Technical Lead, Tech for Social Good, Swarthmore, PA   **Oct. 2019 – May 2020**
- Managed the project roadmap, communications, and led web development for a team of 6 to create an educational website with Django 2 for the Chester Youth Courts (school-based court that sentences teens with a peer jury).

PROJECTS

air.ly – Find Safe Outdoor Retreats During Wildfires in Real-Time (Python, Flask, JavaScript)
- First-Place Winner for the 2020 PennApps Hackathon Wharton Risk Management Hack for Resilience Route.
- Conducted API calls to the World Air Quality Index API and Yelp API and devised a recommendation algorithm to get the 3 best parks, trails, etc. from each location with health air quality.

CoVerge (React, JavaScript)
- Developing a web application that enables long distance friends to find a middle point to meet up at and indulge in activities such as dining, sightseeing, and more, utilizing the Google Maps and Yelp APIs.
